is the third largest cranberry producing region and the first for organic cranberries

is the largest organic wild blueberry producing region

where you can find the perfect growing conditions:

- Acid soil
- Plenty of fresh water
- Space
- Ideal climate means best coloration pigment
- Rigorous winter means less pesticides use
- No air-application of pesticides
- Ongoing research with Fruit d'Or Crop advisor

WE BELIEVE IN SUSTAINABILITY

- Made without...

- Irradiated products or ingredients
- Preservatives, colours, flavours or chemical additives
- GMOs

WE BELIEVE IN OFFERING THE FRUIT AS NATURAL AS POSSIBLE.
